Business Unit	Information Communication Technology Performance and Integration
Location	130 Lonsdale Street, Melbourne
Employment type	Full Time Ongoing
Reports to	Application Technology Team Lead

About Uniting

Uniting Vic.Tas is the community services organisation of the Uniting Church. We've been supporting people and families for over 100 years. We work alongside people of all ages in local communities in Victoria and Tasmania. Our services reach to Albury-Wodonga in the north, Mallacoota in East Gippsland, the Wimmera region in the west, and across Tasmania.

We empower children, young people and families to learn and thrive. We're there for people experiencing homelessness, drug and alcohol addiction or mental illness. We support people with disability to live the life they choose. We assist older people to maintain their independence and enjoy life. We provide opportunities to access training and meaningful employment. We're proud to welcome and support asylum seekers to our community. We work to empower people with the information, skills and tools they need to live a healthy, happy life.

As an organisation, we work in solidarity with Aboriginal and Torres Strait Islander people as Australia's First Peoples and as the traditional owners and custodians of this land. We celebrate diversity and value the lived experience of people of every ethnicity, faith, age, disability, culture, language, gender identity, sex and sexual orientation. We welcome lesbian, gay, bisexual, transgender, gender diverse and non-binary, intersex, and queer (LGBTIQ+) people at our services. We pledge to provide inclusive and non-discriminatory services.

Our purpose: To inspire people, enliven communities and confront injustice

Our values: We are imaginative, respectful, compassionate and bold

1. Position purpose

The Application Technology Engineer will support the Application Technology Team Lead in managing and supporting effective delivery of applications across the Uniting enterprise. The role of the Application Technology Engineer within this team will be to streamline and ensure applications meet broad business strategy and operational needs. To provide high quality operational and technical application and systems support to support business functions. Adhere to problem and incident management processes, minimising the adverse impact of incidents and problems on the business.

This position will work closely with the Application Technology Team Lead to ensure that there is recognition of the role of innovation, best practice and quality in concert with a high level of security and resilience to deliver effective Information Communication Technology (ICT) application technology. The role is expected to ensure that all the application delivery environment that underpins the Uniting client service delivery is focused to improve staff productivity and benefit Uniting consumers

Position Description

Application Technology Engineer

2. Scope

Budget: nil

People: nil

3. Relationships

Internal

- Infrastructure and Supporting Teams
- Application Owners
- Business Users and Subject Matter Experts

External

- Software Vendors (where applicable)
 - Consultants (where applicable)
-

4. Key responsibility areas

Service delivery

- Develop and maintain the application technologies delivery environment sufficient to meet the needs of a digital organisation.
- Responsible for technical support involved in application lifecycle management
- Plan, deploy & maintain application delivery platforms
- Ensure platforms continue to meet the security, capacity, performance & reliability requirements of the organisation
- Resolve escalated support issues for the technology platforms
- Day to day support of technology that underpins Applications across Uniting
- Ensure application performance with qualitative/quantitative analysis and reporting
- Interact with internal teams and external 3rd party vendors to trouble shoot and resolve complex problems
- Problem solve and troubleshoot technical issues as they arise

ICT functions

- Effective application operations management
- Risk mitigation planning

Working with the organisation

- Work collaboratively with infrastructure and other teams' managers to deliver a robust application delivery and support function
- Minimise business risk and ensure regulatory compliance for Uniting through the effective control of operational risks and the risk and compliance management framework.

Quality and risk

- To ensure the principles of Quality and Customer Value are adhered to and represented in all areas of activity
- To ensure relevant risk criteria and measures are addressed as appropriate
- To support the work of the Application Technology team in relation to Customer Value, Risk and Quality.

Personal accountability

- Compliance with Uniting's values, code of conduct, policies and procedures and relevant government legislation and standards where relevant.
- Cooperate with strategies to actively ensure the safety, protection and well-being of children who come into association with us.

Position Description

Application Technology Engineer

- Ensure appropriate use of resources.
- Work collaboratively with Uniting (Victoria Tasmania) employees and external stakeholders in accordance with Uniting's values and professional standards of behaviour.
- Actively participate in initiatives to maintain, build upon and promote a positive and collaborative workplace.
- Identify opportunities to integrate and work collaboratively across teams.
- Take reasonable care for your own health and safety, and health and safety of others (to the extent required).
- Promote a positive safety culture by contributing to health and safety consultation and communication.
- Promptly respond to and report health and safety hazards, incidents and near misses to line management
- Attend mandatory training sessions (i.e. equal employment opportunity, health, and safety) and mandatory training specific to position.

5. Performance indicators

Performance Indicators will be identified in collaboration with the role holder and also the Application Technology Team Lead as part of the wider ICT planning process. These will follow the mission and ethos of the organization and also address key deliverables under Uniting Guiding Principles and also align to the outcomes of the Operating Model.

6. Person specification

Qualifications & Experience

- Tertiary qualification in an Information Technology field or related industry experience
- Experience in application delivery using enterprise application delivery methods (SCCM/APPV/Intune)
- Extensive problem solving and debugging skills
- Ability to independently apply production upgrades and support the products and technologies
- Proven experience implementing business systems & applications within large organisations.
- Experienced in Problem and Incident Management, working in an ITIL environment will be highly regarded
- Experience with Microsoft cloud technology solutions
- Working knowledge of databases (SQL Server/Access) and programming languages (Java script, VBA for Macros)
- A passion in customer first approach and linkage of all organisational roles to the customer
- Must be able to work independently where appropriate and also contribute to the shared values and activity of the wider team.

Core selection criteria

- **Values alignment:** ability to demonstrate and authentically promote Uniting's values.
- **Organisational Change:** ability to deliver in a changing, in a fast-paced, iterative environment
- **Application technology Management skills and experience** – as detailed above
- **Project Experience:** – as detailed above.

7. We are a child safe organisation

Uniting is a child safe organisation and is committed in everyday practice to ensure the safety and wellbeing of all children, at all times.
